*FOR IMMEDIATE RELEASE*

## **Janos Technology Unveils New Website with e-Store**

**October 26, 2004 – Townshend, VT – Janos Technology, Inc.**, a leading manufacturer of precision infrared (IR) optical components, lenses and assemblies for defense, aerospace and OEM commercial markets, has recently unveiled an enhanced, user friendly and informative website. The new site features 250 plus pages of technical information on infrared coatings, materials, optical design data and has an online e-store with hundreds of in-stock items for quick and easy ordering.

Several industry applications for Janos' optical components and systems are clearly displayed on the new home page and include commercial OEM, defense, security and surveillance, R&D, astronomy and education. The new navigation bar offers web visitors intuitive access to products, applications and the new online store. An RFQ page will deliver requests and responses within 24 hours. The new website also has a "Knowledge Center" that will answer FAQs and provide more in-depth technical articles, optical design notes, optical materials information, infrared lens selection and a general optical reference guide.

Director of Marketing for Janos Technology, Mark Lenhart, notes, "The new website reflects Janos Technology's new direction in partnering with Defense and Aerospace companies as well as Commercial OEM's, offering them complex subsystems and optical design solutions." He adds, "This is an exciting time of growth for Janos Technology, especially in IR technology. Our highly skilled optical design and engineering team is poised to work with our strategic partners to provide custom optical solutions for challenging applications. We continue to offer standard optical components and lenses for our COTS customers. With our unique and intuitive e-store, we are providing a new level of convenience for ordering and shipping standard items."

Please visit [www.janostech.com](http://www.janostech.com) for a tour of the dynamic new website and online store.
